

## European Project Semester (EPS)

Gain international experience by working on technology-oriented projects in interdisciplinary and multicultural teams

# Shape Your Future at the USTP – University of Applied Sciences St. Pölten

The European Project Semester teaches future professionals to think outside the box and find innovative solutions to problems while being sensitive to different cultures and communities. The EPS is a joint initiative of European universities open to students who have completed at least two years of studies and want to gain experience abroad in an interdisciplinary context.

For one whole semester, participating students work on predetermined projects in the focus areas of Edutainment, Data, Engineering, and Journalism.

Edutainment

Data

Engineering

Journalism

## What can I expect?

EPS students work in small international and interdisciplinary project teams supported by their supervisors and tutors. Accompanying courses provide the basis for the successful completion of the programme. We offer excellent working conditions to our students. The projects are carried out in cooperation with the numerous practice labs, ensuring that the students have access to state-of-the-art equipment and facilities.

## Study Contents

- Multidisciplinary project
- Accompanying courses
- Project management
- Conversation and language courses
- Team-building events
- Social activities

## Admission Process

- Application documents
- Letter of motivation + CV
- Proof of English language proficiency at level B1 or higher
- Online interview

## EPS Project Examples

### Our projects are as diverse as our USTP!

In the course of the EPS, students have developed interactive music apps, designed VR and online games, produced 360° videos, invented smart & sustainable solutions for industry, and created business games. Visit [ustp.at/eps](https://ustp.at/eps) to learn more about past projects and get inspired.

The EPS is hosted by the bachelor programmes of Media Technology, Smart Engineering of Production Technologies and Processes, Creative Computing, Data Science and Business Analytics, and Media Management.
